w: [j.mp/ManikLI](https://www.linkedin.com/in/j.mp/ManikLI)

IT professional with 14 years experience in software development and engineering management

PROFILE

- 9 years experience as an individual contributor in software development, 5 years in technology management
- Have experience managing cross-functional (Dev & QA) teams of up to 15 engineers
- Last position held was with Knowlarity Communications, as Director, Engineering.
- My areas of work typically encompass technical design/architecture, mentorship, people management, business interfacing, product planning, project planning, execution and hiring.
- Worked with Core Java, open source stack, Amazon web services (AWS), Big Data and NoSQL products. Currently working with Python & Django.
- Have exposure to diverse business domains. Have worked on online advertising (search, display & video), equity trading, travel (stored value, coupons), telecom, voice over IP (VoIP), encryption & ASP/SaaS.
- Experience designing & building low latency, scalable, high throughput systems which are extensible and resilient.
- Experience on iterative development & Agile software development using Scrum.
- Have evangelized and promoted adoption of engineering best practices such as unit testing, test automation, continuous integration & deployment (CI/CD), and peer reviews in the teams that I managed
- Worked with distributed teams, across timezones. Have onsite work experience (USA) too.
- Open to exploring different/lateral roles and consulting
